ABOUT ME

AI-Augmented Fullstack Developer who builds and ships fast. Leverages **Cursor AI**, **LLMs (Claude/GPT)**, **PostgreSQL (Supabase)** and **NoSQL (Firebase)** to bridge the gap between idea and MVP in record time. Passionate about **AI-driven development** and **rapid prototyping**. Not just writing code, but orchestrating AI to build scalable web and mobile solutions.

ORGANIZATION EXPERIENCE

December 2023 – January 2025

Vice President Club, Information Technology Club, Universiti Tun Hussein Onn Malaysia

- **Led the technical planning** for 17+ events, analyzing infrastructure needs and coordinating deliverables with cross-functional teams (Consulting posture).
- **Synthesized post-event technical reports**, identifying operational gaps and recommending workflow improvements to optimize resource usage.

December 2021 – February 2023

Executive Multimedia, Student Representative Council, MPP Universiti Teknologi MARA, Johor

- Managed **digital assets and user access rights**, ensuring system reliability and data integrity for 500+ active users.
- Demonstrated **autonomy** in resolving complex technical issues, maintaining clear communication with stakeholders to ensure zero downtime.

PROJECTS

Student Talent Profiling App – Fullstack Ecosystem

- **Shipped a dual-interface solution** (Flutter App + Web Admin) by orchestrating AI workflows (Cursor) to generate complex UI components and backend logic 50% faster.
- **Built dynamic profiling algorithms** on Supabase (PostgreSQL) that instantly categorize user talents, ensuring seamless real-time data synchronization between mobile users and admin analytics.

StyleHub – Fullstack E-Commerce Engine (React, Node.js, PostgreSQL)

- **Engineered a production-ready architecture** implementing JWT authentication and Stripe payment integration, utilizing microservices concepts to handle complex cart state and secure transactions.
- **Deployed a scalable ecosystem** (Vercel/Render) with mobile-first design and optimized PostgreSQL queries, delivering high-performance product filtering and real-time inventory management.

EDUCATION

October 2023 – December 2026

Bachelor's Degree, Information Technology, Universiti Tun Hussein Onn, Malaysia

October 2020 - February 2023

Associate degree, Information Management, Universiti Teknologi MARA, Malaysia

CERTIFICATE

[CCNA: Introduction to Networks, Cisco](#) – Sep 2024

Skills gained: Network architecture, IP connectivity, and security fundamentals.

[Google IT Support, Google](#) – May 2025

Skills gained: System administration, IT security, and end-to-end troubleshooting.

CORE SKILLS

- **AI & Speed Coding: Cursor AI Power User** (Composer/Agent), **Prompt Engineering** (Chain-of-Thought/System Prompts), **RAG Concepts**, Automating Workflows.
- **Fullstack Tech: Flutter** (Cross-platform), **Firebase** (Auth, Firestore, Functions), **Web Technologies** (HTML/JS/CSS), **Python** (AI Scripting).
- **Development Style: Rapid MVP Building, Shipping to Production**, Debugging with AI, Git/Version Control.
