

# MUHAMMAD NOOR AZAMI

AI-Enhanced Cloud & DevOps Engineer | Systems & Infrastructure

Kuala Lumpur, Malaysia   noorazami@outlook.my   linkedin.com/in/noor-azami   github.com/AmiQT   amiqt.github.io/portfolio

## PROFESSIONAL SUMMARY

AI-Enhanced Systems & Cloud Engineer with hands-on mission-critical Data Center experience, specializing in **Infrastructure-as-Code (Terraform)**, **Kubernetes platform orchestration**, and automated CI/CD pipelines. Proven track record bridging bare-metal server infrastructure with scalable cloud-native architectures, zero-trust security, and proactive observability (Prometheus/Grafana). Experienced in architecting custom OpenAI-compatible proxy gateways and integrating autonomous agentic AI workflows into production systems.

## TECHNICAL COMPETENCIES

|                       |                                                                                                                                                  |
|-----------------------|--------------------------------------------------------------------------------------------------------------------------------------------------|
| Cloud & IaC           | AWS (EC2, S3, IAM, ECR, SSM Parameter Store), <b>Terraform</b> (Modular Multi-Layer IaC), <b>Cloudflare Zero Trust</b>                           |
| Containers & K8s      | <b>Kubernetes (K8s)</b> , <b>k3s / k3d</b> , <b>Helm</b> , <b>Docker</b> , <b>NGINX Ingress Controller</b> , Least-Privilege RBAC, Health Probes |
| CI/CD & DevSecOps     | <b>GitHub Actions</b> (Keyless AWS OIDC), <b>Jenkins</b> , Automated Linting, Compliance-as-Code, Secret Masking                                 |
| Observability & Tools | <b>Prometheus</b> , <b>Grafana</b> , <b>kube-prometheus-stack</b> , Active Directory, M365 IAM, Linux SysAdmin, Git                              |
| Languages & Scripting | <b>Python</b> , <b>Go</b> , <b>Bash</b> , <b>PowerShell</b> , <b>TypeScript</b> , <b>SQL</b>                                                     |
